AT BEACON CENTER'S
MENTAL HEALTH
PROGRAM ...

Trained professionals are available to provide services to people of all ages needing help with anxiety, depression, bipolar, posttraumatic stress and other mental health disorders. Medications are also available to help manage symptoms. Services may be delivered in person or through telemental health and include an evaluation followed by individual, group and family counseling.

The care offered is affordable and reaffirms the individual's self-worth and inherent human dignity. Our staff is caring, compassionate, and professionally competent, and the facility is discreet, attractive, comfortable, and accessible.

The unprecedented COVID-19 Pandemic has been hard for everyone. We offer specified counseling for those on the front lines, from police officers, EMS and Firefighters to the nurses and doctors in our healthcare facilities.

Telemental health counseling available
